

# Castlebury Council

Dear Resident

## Update on our Air Waste Routes

You fall in the catchment zone, living underneath the main sky waste route from business recycling drops to our waste depot on the edge of town.

Following the launch of our air waste corridors, we are pleased to tell you that

- We are meeting our net zero carbon targets as a local council
- We have created 30 jobs for newly qualified pilots from the area
- Rush hour congestion on the roads has reduced by 10%
- We now run the greatest number of remote pilot waste drones in the country
- We are processing 200 tonnes of waste and recycling that enter our depot by air each week

## Consultation for Air School Routes

After the recent local election, a key issue raised was the lack of school transport from the Nightingale and Collins Estates to the two primary and one secondary schools in our area.

We are holding consultation at the end of next month to explore the possibility of using the waste routes during weekdays for sky buses, at 8am - 9am and 3pm - 4.30pm for school transit, offering quick and clean transport for 170 children daily.

Join us at the town hall next week to share your views.

Sincerely

*Jerome Bracknell*
